Biosketch

My work involves the development of innovative technologies that support genome editing and DNA synthesis, with a particular emphasis on creating new software tools. In collaboration with Professor Yachie from UBC and Osaka University, we are currently engaged in developing 'DNA Event Recording' technology. This technology is designed to encode the historical molecular dynamics of cells into DNA sequences. Furthermore, as of October 2023, I have started a project that empowers AI to automate the design and synthesis of DNA sequences. The goal of this project is to harness AI technology to enhance the efficiency and innovation of DNA sequence design and synthesis, thereby advancing biological methodologies.

Education

March 2023 Ph.D., Systems Biology Program, Keio University, Tokyo, Japan

March 2018 M.M.G., Systems Biology Program, Keio University, Tokyo, Japan

March 2016 B.A., Faculty of Environmental Information, Keio University, Tokyo, Japan.

Work Experiences

2023-Today	Specially Appointed Associate Professor (Full-Time) Premium Research Institute for Human Metaverse Medicine (PRIME), Osaka University
2021-2023	Research Assistant (ITCK Fellow) Institute for Advanced Biosciences, Keio University
2016-2021	Research Assistant Research Center for Advanced Science and Technology, The University of Tokyo
2018-2019	Research Associate (Fixed term/Research incentive) Graduate School of Media and Governance, Keio University
2014-2018	Research Assistant (ITCK Fellow) Institute for Advanced Biosciences, Keio University

Research Experiences

2016-Today	@Yachie laboratory Research Center for Advanced Science and Technology The University of Tokyo Premium Research Institute for Human Metaverse Medicine (PRIME) Osaka University (2023-Today) Automating DNA Design & Synthesis Using Conversational AI (2016-Today) Development of software tools to accelerate the development of genome editing tools and their applications (2020-2022) A framework to efficiently describe and share reproducible DNA construction protocols https://github.com/yachielab/QUEEN (2019-2021) Screening of new genome editing tools (2019-2021) Development of a novel hierarchical DNA assembly method (2018-Today) A universal platform to analyze genome editing outcomes (2018-2020) A machine learning model to predict base editing outcomes https://github.com/yachielab/base-editing-prediction
------------	---

(2016-2018) A software tool to screen new genome editing-associated gene candidates
<https://github.com/yachielab/SPADE>

- 2021-2023 @Ikawa laboratory
 The Institute of Medical Science, The University of Tokyo
 Exploring the mechanism for species-specific fusion of male and female gametes.
- 2013-2016 @Naito laboratory,
 Institute for Advanced Biosciences, Keio University
 Development of a web-based biological model simulation environment

Fellowships and Research grants (as PI)

- 2023.10–2029.03 Japan Science and Technology Agency (JST) CREST (BioDX) (JPY 13,000,000 / 5.5 years)
 2020.04–2022.09 JSPS Research Fellowship (DC2) Japan Society for the Promotion of Science

Awards

- 2024.05 The 23rd Funai Information Technology Award for Young Scientists
 2024.02 The 40th Inoue Research Award for Young Scientists.

Research Achievements

+Equal contribution. Mori H is **bolded and underlined**. *Mori H is (co-)first author. [Selected papers](#).

Preprints

- 1- Ishikawa Y Y, Emori C, **Mori H**, Endo T, Kobayashi K, Watanabe Y, Sagara H, Nagata T, Motooka D, Ninomiya A, Ozawa M, Ikawa M. Age-associated aberrations of cumulus-oocyte interaction and microfilamentous structure in the zona pellucida decline female fertility.
bioRxiv. 2023 Dec 30, <https://doi.org/10.1101/2023.12.30.573680>
